# Project description

Cashflow is helping millions of people with their financial habits and mindfulness in a super easy and intelligent way. Cashflow creates healthy financial habits that reduce your financial stress, increase your financial knowledge, and develop your financial skills.

The purpose of this simple cashflow system project is twofold:

- 1) Sees all bank cards and their balance in one place, also changes them to your sole discretion.
- 2) You can keep track of your daily income and daily life expenses

Cashflow - The Smart Financial Spreadsheet!

Easily plan and track your finances with Cashflow.

Do you care about your financial future?

Let Cashflow help you!

SDU 2022

# Inflows page

The screenshot shows the 'My inflows' section of the Cash App. At the top, there is a green 'Create inflow' button. Below it is a table with columns: Name, Category, Registered at, Registered by, and Value. A message at the bottom of the table says 'Entries were not found for the current month.'

The screenshot shows the 'Create entry' form. It has fields for Name (Salary), Category (Salary), Data (16.05.2022), and Value (150000). A green 'To save' button is at the bottom.

2

The screenshot shows the 'My inflows' section after creating two entries. A message at the top says 'A new inflow was created!'. The table lists two entries:

Name	Category	Registered at	Registered by	Value
Scholarship	Scholarship	12/05/2022	admin	32000.00
Salary	Salary	16/05/2022	admin	150000.00

# Overview page

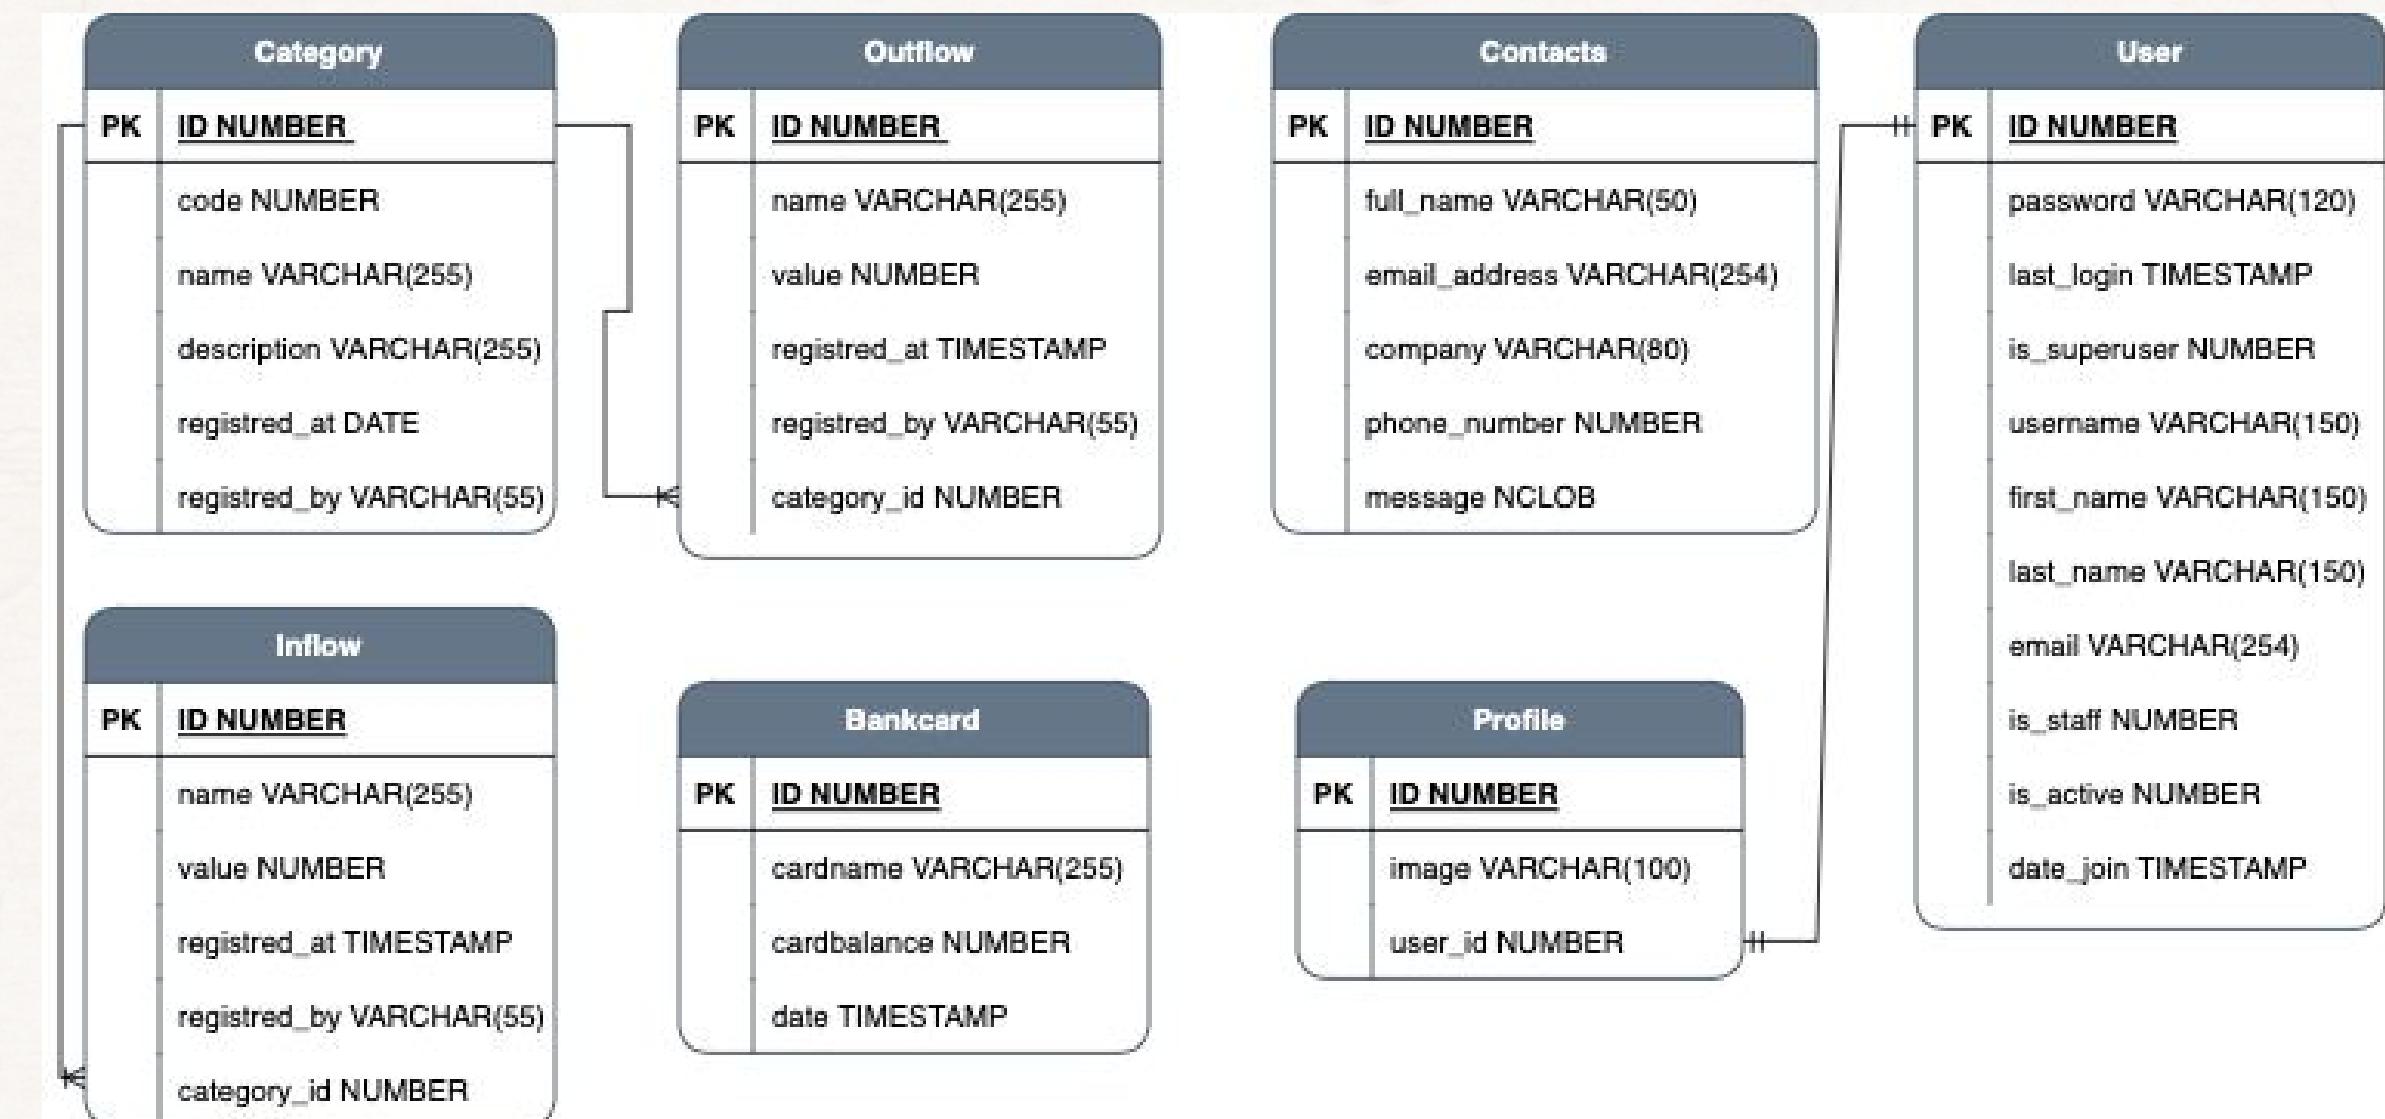

# The Architecture

# History

- 1) Firstly, We found the models
- 2) Then created the HTML/CSS files
- 3) From different templates, we choose the one and started our UI/UX design connecting to django
- 4) Hardly worked on main functions
- 5) Pushed all the files to github repository
- 6) And at the end of the project, we went to the canteen to drink tea:)
